

Achmad Sendy

Web Developer & IoT Engineer | Mechatronics Engineering Student

achmadsendy91@gmail.com - Phone: 0857-9081-2139 - Sleman, D.I. Yogyakarta, Indonesia

Portfolio: achmadsendy.my.id - linkedin.com/in/achmadsendy - github.com/AchmadSendy

SUMMARY

Mechatronics Engineering student (GPA 3.71) and freelance Web Developer & IoT Engineer with 3+ years delivering real client projects - from websites & landing pages (WordPress, Laravel) to IoT & SCADA-based industrial automation. Comfortable working remotely, turning user needs into clean, easy-to-use technical solutions. Eager to learn and contribute in a collaborative team.

SKILLS

Web	WordPress, Elementor Pro, Laravel, CodeIgniter 3, PHP, JavaScript, jQuery, Bootstrap, Tailwind CSS, HTML5 & CSS3, MySQL
IoT / Embedded	Arduino, ESP32, STM32, MQTT, SCADA & HMI, Firebase
Tools	Flutter, Figma, Git, XAMPP, Laragon

EXPERIENCE

Process Analyst & System Developer <i>PT. HSEO Grha Tekno (Freelance)</i>	Dec 2025 - Present Sleman - Hybrid
Designing & developing an Integrated Cashier and Management System for Week N Bakery (already in production); writing the SRS document and bridging stakeholder needs with a scalable technical solution.	
Freelance Mechatronics Developer <i>Fastwork.co</i>	Jan 2024 - Present Remote
Delivering industrial automation & sensor-system projects: mechanical-electronic integration, control/power wiring design, custom PCBs, and microcontroller programming for the production flow.	
Freelance Web Developer <i>Fastwork.co</i>	Jan 2023 - Present Remote
Building responsive landing pages & websites with WordPress & Elementor Pro, from Figma wireframes to deployment, focusing on loading performance and basic SEO.	
Technology Content Creator & Technical Writer <i>SendySkot</i>	Jan 2022 - Present Remote
Creating electronics & mechatronics educational content on YouTube/TikTok and writing technical articles on IoT and microcontrollers at sendyskot.my.id.	
IT Support Specialist (Internship) <i>PT Geo Equator Indonesia</i>	Apr 2021 - Jul 2021 Mojokerto - On-site
Managed the company website, spatial data management with QGIS & ArcGIS Online, and IT hardware support.	

EDUCATION

Bachelor of Mechatronics Engineering Education <i>Yogyakarta State University (UNY)</i>	2023 - May 2027 GPA 3.71
Focused on integrating mechanical systems, electronic control & programming for industrial automation (PLC, Arduino/ESP32/STM32, Fusion 360). Technical Lead at the INFINITE community.	

SELECTED PROJECTS

Smart Warehouse IoT System <i>ESP32 - MQTT - Laravel - Arduino</i>
Warehouse air-circulation monitoring & control: temperature/humidity & gas sensors, servo and exhaust-fan control via MQTT + a Laravel web dashboard.
AgriSmart - Smart Agriculture System <i>ESP32 - Flutter - Firebase - IoT</i>
Real-time agricultural environment monitoring with ESP32 nodes, Firebase cloud, and a cross-platform Flutter mobile app.
Industrial SCADA - Oil Tank Monitoring <i>SCADA - InduSoft - Arduino - HMI</i>
SCADA-based oil-tank monitoring & control with an ultrasonic sensor, a manual/automatic HMI, and data logging.
Automated Dough Pusher (Industrial Bakery) <i>Stepper NEMA 23 - DM542 - Custom PCB</i>
Automated dough-pushing system with precise motion control and a custom PCB for stable power distribution.

CERTIFICATES

Alibaba Cloud Certificate - Software Engineering Competency (RPL) - GIS Operator Internship, PT Geo Equator Indonesia (2021)
