

Achmad Sendy

Web Developer & IoT Engineer | Mechatronics Engineering Student

achmadsendy91@gmail.com - Phone: 0857-9081-2139 - Sleman, D.I. Yogyakarta, Indonesia

Portfolio: sendy-porto.vercel.app - linkedin.com/in/achmadsendy - github.com/AchmadSendy

SUMMARY

Mechatronics Engineering student (GPA 3.71) and freelance Web Developer & IoT Engineer with 3+ years delivering real client projects - from websites & landing pages (WordPress, Laravel) to IoT & SCADA-based industrial automation. Comfortable working remotely, turning user needs into clean, easy-to-use technical solutions. Eager to learn and contribute in a collaborative team.

SKILLS

Web	WordPress, Elementor Pro, Laravel, CodeIgniter 3, PHP, JavaScript, jQuery, Bootstrap, Tailwind CSS, HTML5 & CSS3, MySQL
IoT / Embedded	Arduino, ESP32, STM32, MQTT, SCADA & HMI, Firebase
Tools	Flutter, Figma, Git, XAMPP, Laragon

EXPERIENCE

Process Analyst & System Developer

Dec 2025 - Present

PT. HSEO Grha Tekno (Freelance)

Sleman - Hybrid

Designing & developing an Integrated Cashier and Management System for Week N Bakery (already in production); writing the SRS document and bridging stakeholder needs with a scalable technical solution.

Freelance Mechatronics Developer

Jan 2024 - Present

Fastwork.co

Remote

Delivering industrial automation & sensor-system projects: mechanical-electronic integration, control/power wiring design, custom PCBs, and microcontroller programming for the production flow.

Freelance Web Developer

Jan 2023 - Present

Fastwork.co

Remote

Building responsive landing pages & websites with WordPress & Elementor Pro, from Figma wireframes to deployment, focusing on loading performance and basic SEO.

Technology Content Creator & Technical Writer

Jan 2022 - Present

SendySkot

Remote

Creating electronics & mechatronics educational content on YouTube/TikTok and writing technical articles on IoT and microcontrollers at sendyskot.my.id.

IT Support Specialist (Internship)

Apr 2021 - Jul 2021

PT Geo Equator Indonesia

Mojokerto - On-site

Managed the company website, spatial data management with QGIS & ArcGIS Online, and IT hardware support.

EDUCATION

Bachelor of Mechatronics Engineering Education

2023 - May 2027

Yogyakarta State University (UNY)

GPA 3.71

Focused on integrating mechanical systems, electronic control & programming for industrial automation (PLC, Arduino/ESP32/STM32, Fusion 360). Technical Lead at the INFINITE community.

SELECTED PROJECTS

Smart Warehouse IoT System *ESP32 - MQTT - Laravel - Arduino*

Warehouse air-circulation monitoring & control: temperature/humidity & gas sensors, servo and exhaust-fan control via MQTT + a Laravel web dashboard.

AgriSmart - Smart Agriculture System *ESP32 - Flutter - Firebase - IoT*

Real-time agricultural environment monitoring with ESP32 nodes, Firebase cloud, and a cross-platform Flutter mobile app.

Industrial SCADA - Oil Tank Monitoring *SCADA - InduSoft - Arduino - HMI*

SCADA-based oil-tank monitoring & control with an ultrasonic sensor, a manual/automatic HMI, and data logging.

Automated Dough Pusher (Industrial Bakery) *Stepper NEMA 23 - DM542 - Custom PCB*

Automated dough-pushing system with precise motion control and a custom PCB for stable power distribution.

CERTIFICATES

Alibaba Cloud Certificate - Software Engineering Competency (RPL) - GIS Operator Internship, PT Geo Equator Indonesia (2021)
